DERMAL FILLERS

Our range of Dermal fillers are Allergan only, premium grade products.

There are several different viscosities (*thicknesses*) of the product, which are purpose specific for treating areas of volume loss. These products range between \$500 and \$580 per mL. All of them contain lignocaine (*a local anaesthetic*) manufactured into the product to minimise any pain and help make the treatment as comfortable as possible. Topical numbing cream and ice are also used to minimise any minor discomfort you may experience.

Areas treated with dermal filler at injectables clinic include the temporal hollows, tear troughs, cheeks, lips, peri-oral lines, marionettes, accordion lines, jawline, jowls, chin and mentalis.

*You only have one reflection,
make it your best one!*

MINT PDO THREADS \$1200+

PDO Thread Lifts target the loss of elasticity in the skin and are designed to lift, tighten, and restore volume. Ultimately revealing a younger and more revitalised appearance. The treatment involves fine collagen threads being inserted within the skin, which stimulate collagen, elastin, and hyaluronic acid. This stimulation of proteins results in long term benefits that continue to improve over time.

Areas treated include full face, upper and lower lip, brow, jaw, chin, and tear troughs.

*The results of your PDO threads will be seen within 1-2 months of your treatment. For all thread procedures, we advise clients to book an injectables consultation appointment to assess your suitability.

Treatment Time: 90 Minutes
(+45 minutes for numbing cream prep)

Downtime 1-2 Days

MINT Non-Surgical Facelift \$3990+

The thread lift is a minimally invasive cosmetic procedure that aims to lift and lighten the superficial fat pads of the face and neck. The material is polydioxanone (PDO). PDO threads are inserted beneath the skin, stimulating the production of your own collagen and improving your overall complexion. This treatment supports sagging skin caused by aging and is ideal for deep nasolabial folds, heavy jowels and sagging cheeks. This treatment can also improve your jawline and restore lost volume over time. Benefits of this treatment can last from 12 months up to 2 years.

Treatment Time: 90 Minutes
Downtime 3-7 Days

**For all PDO mechanical lift procedures, we advise clients to book a consultation appointment to assess your suitability.*

Please Check In...

Injectables [Covid Safe Plan]

Attention Valued Injectables Clients,
Please use the hand sanitizer provided before entering
our clinic.

Please, no plus ones to your appointment!

If you are feeling unwell please consider how closely we
are working with you and reschedule your appointment
for a time where you are feeling 100%.

We care about you!

Love team injectables xxx

*Please sanitise your
hands upon entering
and leaving the clinic!*

*If you are feeling
unwell or have a
temperature, please
reschedule!*

*All practitioners will
be wearing masks
throughout your
treatment.*

Cancellation Policy

All cancellations require 24 hours notice so that your appointment time does not go to waste. This includes gift voucher clients as well. Failure to do so may result in a charge of 50% of the service booked.

Clinic Etiquette

Please arrive 5-10 minutes prior to your appointment so that we may ensure all treatments run on time. Failure to do so may result in your treatment being cut short. Please be courteous to the clients coming in after you.

Bookings

Bookings are important to allow for enough time for requested services. We do accept walk-ins, however, they are not guaranteed. Bookings may be made through our website or by calling the clinic directly.

Gift Vouchers

Are an incredible gift and are available for purchase in clinic or over the phone.
